

Introducing

Catalyst AC-11

DNA Restoration Serum

Now with More DNA Repair & Increased Collagen Production Even for Sensitive Skin Clients

- Clinically proven AC-11 increases DNA repair by 33%, transforming skin by utilizing the powerful benefits of Cat's Claw.
- Using a key component in the formation of collagen, alpha-ketoglutarate, with a lower dose L-Ascorbic acid, means more collagen and Zinc Finger Protein production that sensitive skin can also benefit from.
- Increased amino acids allow for more healing, collagen and elastin production.
- Vitamin E protects and repairs skin and creates a super antioxidant when combined with Vitamin C to fight off free radicals.

This means more skin repair and rejuvenation through increased skin function, collagen production and healing. You will see less hyperpigmentation, less UV damage, fewer fine lines & wrinkles and improved wound repair from acne.

**All with a cherry on top-
cherry scented that is.**

We've taken everything you love from Catalyst and Catalyst Plus+ and increased it's effectiveness while maintaining its sensitivity.

How Do I Choose the Right Catalyst Product ?

Catalyst AC-11

If you are looking for the most restoration for your skin with a cherry scent and aloe base for hydrating, try our "New" Catalyst AC-11.

Catalyst AC-11

Catalyst

Get great DNA repair and collagen production with our highest level of Vitamin C. Catalyst has stood the test of time in a liquid base that allows for quick penetration.

Catalyst

Catalyst Plus+

If you are highly sensitive, Catalyst Plus+ will help improve the strength of your skin while treating all skin conditions and diminishing sensitivity.
